

John Heidelberg Named Client Delivery Leader of InsPro Technologies

Eddystone, PA – April 3, 2018 – InsPro Technologies, LLC, a leading provider of core policy administration software for Group and Individual Life, Health, and Annuity products that enables insurance carriers and third-party administrators to quickly respond to evolving market needs, improve customer service, and reduce operating costs, has named John Heidelberg as Client Delivery Leader.

“John is a strong leader who has focused his career on improving software delivery practices and building high-performing teams, with a passion for on-time and on-budget delivery of solutions designed to solve real-world business problems,” said David Anderson, CEO of InsPro Technologies. “He brings nearly three decades of experience in the insurance and financial services industries to our company and is a natural fit for our organization in a role focused on the continued success of our clients. We look forward to working closely with him.”

As InsPro’s Client Delivery Leader, John will be providing direction to the organization responsible for partnering with customers to ensure they obtain the maximum value and success in employing the *InsPro Enterprise* platform, designed to improve operational performance and increase overall productivity in launching and administering insurance products.

“Having a market-leading policy administration platform is only part of the key to optimal business operations. The other part is successfully configuring and integrating that software within the corporate ecosystem in a predictable and cost-effective way,” said Heidelberg. “I’m excited to be coming to this innovative company and to be working with a top-quality, client-centric delivery organization focused on ensuring its customers achieve the maximum business value for their investment.”

Prior to joining InsPro, Heidelberg spent several years as an independent management consultant, creating and executing enterprise technology strategies for a variety of national and global insurance and financial services companies, significantly improving how they leverage information technology to achieve outstanding business results. He also served as Vice President and Chief Information Officer at Guardian Life Insurance Company of America, in addition to holding leadership positions at Prudential Property & Casualty Insurance Company, Business Edge Solutions and American Management Systems.

He holds a Master of Science in Computer Science from Monmouth University and a Bachelor of Arts in Computer Information Systems from the University of Scranton.

About InsPro Technologies Corporation

Through its subsidiary, InsPro Technologies, LLC, InsPro Technologies Corporation offers *InsPro Enterprise*, an end-to-end, web-based policy administration system used by insurance carriers and third-party administrators. By managing the entire product and policy lifecycle on a single integrated platform, customers are afforded opportunities to accelerate new product introductions, lower costs, increase customer satisfaction and improve operational performance. InsPro’s solutions are offered through standard software licensing, as a hosted solution, or via Software as a Service (SaaS) delivery.
